SUMMARY

Product designer with **5+ years** in AI-native and enterprise SaaS, making complex, data-heavy workflows clear and usable across finance, insurance, manufacturing, healthcare and logistics.

EXPERIENCE

LeewayHertz Technologies

Gurugram (Remote)

Senior UI/UX Designer

Apr 2026 – Present

- **Accelerated design-to-development workflows** by building production-ready front ends with AI coding tools, resulting in **30% faster** UI implementation and **40% fewer** visual corrections in the development cycle.
- **Designed ZBrain Platform's admin panel features** that let admins monitor and manage AI agents, connectors, agentic solutions and API keys from one place. Partnered closely with the engineering team to learn how each of them works before designing it. It is live, and **12+** enterprise organisations govern their agents through it.
- **For Applied Materials, led the end-to-end design** of 0-to-1 features for a conversational troubleshooting copilot on mobile and web. Ran usability testing with the 100+ field engineers in its pilot, and their test report showed **60% less** time to find a fix and **70% fewer** escalations; the console logs a **64%** resolution rate.
- **Extended the copilot with an admin console**, where admins track adoption, conversations, resolution rate and response time, and a feedback loop: a flagged answer becomes a scoped, versioned fix that every later answer reuses, so the copilot improves with use.
- Owned post-deployment design QA and **mentored 2 designers** through structured critique, while sustaining **80%** first-iteration client acceptance across engagements.

UI/UX Designer

May 2021 – Mar 2026

- **Led the Fresenius Medical Care project**, designing three connected portals (Cash Application, Invoice to Pay, Admin), so finance teams handle payment and invoice exceptions in one consistent flow. In the US, ambiguous AR exceptions reduced to **14%** from 28%; it is live in **5 countries**, with about 15 more rolling out across EMEA, APAC and LatAm.
- **Designed Americold's five connected portals** (risk, profile adherence, compliance, safety training and admin) and a training chatbot as sole designer, handling data from **230+** facilities. Mapped exception conditions so each screen shows the right data, and built about **90%** of the system from reusable components across its tables, forms and detail views.
- **Built Safe-Guard Products International's AI-grounded insurance claim assessment tool**, cutting processing time **40%** and manual effort **25%**.
- **Redesigned The Hackett Group's website** with brand guidelines and design systems, lifting pages per session **30%**.
- **Shipped web and mobile applications** across Web3, blockchain, metaverse, crypto and NFTs for global clients like **SobonSobo, Scrut, BabyPass, Kinesis, XinFin and Fortune 500 companies**.

Freelance · Product Designer — 2020 – 2021

Tech Mahindra · Support Engineer — 2017 – 2020

SKILLS

AI & Enterprise. AI-Native Products, Agentic AI Workflows, Semantic Search, Conversational UI, AI Governance

Product & UX. User Research, Information Architecture, User Flows, Wireframing, Prototyping, Interaction Design

UI & Systems. Design Systems, Component Libraries, Design Tokens, Data-Heavy Interfaces, Dashboards, WCAG

Craft & Leadership. Design Critique, Mentoring, Design QA, Stakeholder Management, Developer Handoff, Agile & Scrum

Tools. Figma, FigJam, Photoshop, Illustrator, Claude Code, ChatGPT

EDUCATION & LANGUAGES

Bachelor of Technology in Computer Science & Engineering, West Bengal University of Technology — 2013 – 2017

Languages. English, Hindi
