Portfolio: indrajit.work

SUMMARY

Product designer with **5+ years** in AI-native and enterprise SaaS, making complex, data-heavy workflows clear and usable across finance, insurance, manufacturing, healthcare and logistics. I blend design craft, product thinking and AI to turn problems into simple, working experiences.

EXPERIENCE

LeewayHertz Technologies

Gurugram (Remote)

Senior UI/UX Designer

Apr 2026 – Present

- **Worked on the admin console for ZBrain**, letting admins monitor and manage its agents, connectors, agentic solutions and API keys from one place. Partnered closely with developers to learn how agents and API keys work before designing the workflow. It is live, and **12+** enterprise organisations govern their agents through it.
- **Accelerated design-to-development workflows** by building production-ready front ends with AI coding tools, resulting in **30% faster** UI implementation and **40% fewer** visual corrections in the development cycle.
- **For Applied Materials, led the end-to-end design** of 0-to-1 features for a conversational troubleshooting copilot on mobile and web. The **100+** field engineers in its pilot reported **60% less** time to find a fix and **70% fewer** escalations.
- **Extended the copilot with an admin console**, where admins track adoption, conversations, resolution rate and response time, and a feedback loop: a flagged answer becomes a scoped, versioned fix, driving the resolution rate up **4%** in a month.
- Owned post-deployment design QA and **mentored 2 designers** through structured critique, while sustaining **80%** first-iteration client acceptance across engagements.

UI/UX Designer

May 2021 – Mar 2026

- **Led the Fresenius Medical Care project**, designing three connected portals (Cash Application, Invoice to Pay, Admin), so finance teams handle payment and invoice exceptions in one consistent flow. In the US, ambiguous AR exceptions **halved** (28% to 14%); it is live in **5 countries**, with about 15 more rolling out across EMEA, APAC and LatAm.
- **Designed Americold's five connected portals** (risk, profile adherence, compliance, safety training and admin) and a training chatbot as sole designer, handling data from **230+** facilities. Mapped exception conditions so each screen shows the right data, and built about **90%** of the system from reusable components across its tables, forms and detail views.
- **For Safe-Guard Products, built the entire workflow** of an AI-native insurance claim assessment tool, cutting processing time **40%** and manual effort **25%**.
- **Redesigned The Hackett Group's website** with updated design systems and brand guidelines, lifting pages per session **30%**.
- **Shipped web and mobile applications for XinFin, SobonSobo, Scrut and BabyPass**, among other global clients.

Freelance · Product Designer — 2020 – 2021

Tech Mahindra · Support Engineer — 2017 – 2020

SKILLS

AI & Enterprise. AI-Native Products, Agentic AI Workflows, Semantic Search, Conversational UI, AI-Assisted Prototyping

Product & UX. User Research, Usability Testing, Information Architecture, User Flows, Wireframing, Interaction Design

UI & Systems. Design Systems, Component Libraries, Design Tokens, Data-Heavy Interfaces, Dashboards, Accessibility (WCAG)

Craft & Leadership. Design Critique, Mentoring, Design QA, Stakeholder Management, Developer Handoff, Agile & Scrum

Tools. Figma, FigJam, Photoshop, Illustrator, Claude Code, ChatGPT

EDUCATION & LANGUAGES

Bachelor of Technology in Computer Science & Engineering, West Bengal University of Technology — 2013 – 2017

Languages. English, Hindi
